

SterilContainer™ System

The Preferred Alternative to Blue Sterile Wrap

Aesculap Surgical Technologies – Sterile Processing

AESCULAP®

Cost Effective Reusable Container System

As the market leader – Aesculap can support your Green Purchasing Initiatives while reducing your Operating Expenses without sacrificing product quality.

- Low Operating Expense Per Use
- Green Healthcare Minimizes Waste Stream
- Clinical Efficiency
- Easy Care and Handling

Green Healthcare Minimizes Waste Stream

Approximately 19% of surgical services waste stream is from Blue Sterile Wrap, which must be purchased new for each sterilization cycle, is not reusable and not always cost effective to recycle.*

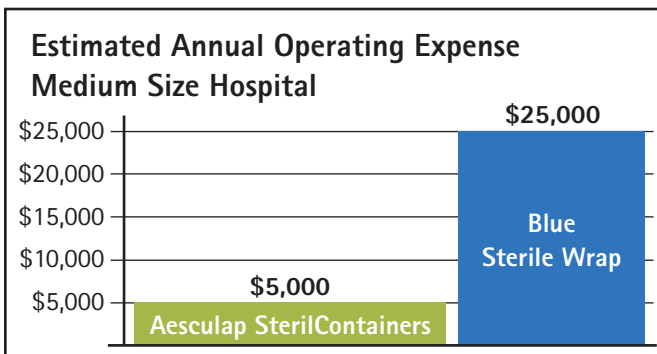

Feature

SterilContainer products are a reusable, environmentally-friendly solution.

Benefit to you

Supports your facility's green purchasing initiatives.

Low Operating Expense Per Use

Blue Sterile Wraps are a high-cost disposable item which typically cost 80% more per use than SterilContainer products.

Feature

SterilContainer products have a long service life and use few low-cost disposable items.

Benefit to you

Lowers your operating expense and allows your facility to do more within budget.

Note: Picture to Scale

Clinical Efficiency

Blue Sterile Wraps are susceptible to pinhole punctures and tears, and require inspection at point of use for sterile integrity. A compromise of the sterile boundary could lead to delays and added reprocessing costs.

Feature

SterilContainer products are made of durable aluminum that forms a rigid barrier impervious to punctures and tears.

Benefit to you

Maintains event-related sterility and reduces reprocessing delays and costs.

Easy Care and Handling

Wrapped sets must be gripped by the sterile barrier, making them awkward to handle, which may lead to abrasions and tears. AORN recommends against stacking of wrapped sets.

Feature

SterilContainer products are engineered with the OR staff and CS/SPD technician in mind to provide a safe, easy-to-handle sterile package system, which can be stacked.

Benefit to you

Reduces the potential for staff injuries and improves processing time.
