Procedural Cost Management System

PCMS Revolves Around Patient Care

0% Investment 100% Functionality

100% Functionality

Surgery with Ease

PCMS brings ease and the latest technology to each and every procedure.

- Re-process sets easily with SterilContainer™ system provided with your customized instrument sets
- Minimize flash sterilization by having the appropriate number of instrument sets available to meet your surgical caseload
- Includes modular laparoscopic instruments that can be cleaned more effectively

Consider an optional on-site PCMS technician

- Processes and assembles the instrument sets
- Ensures sets are ready every time, removing the worry of instrument readiness
- Provides technical support to hospital staff

Services that have Value

PCMS does not just provide a set of instruments, but also the services that go towards maintaining those instruments for the life of your contract.

- Inspection of instruments are performed routinely to ensure they are properly functioning: sharpness, insulation, grasping and locking
- Repair and replacement of old or broken instruments to ensure a complete set for every case
- Supplies included to process the sets: filters, locks and indicator cards
- Support provided for your surgeons, nurses and staff

0% Investment

New Instruments without the Cost

PCMS allows you to obtain new instruments without the capital outlay associated with outright purchases.

- Provide new technology to your surgeons quickly and without capital investment
- Pay only for the number of surgeries the sets are used in
- Capture the costs of instruments used in each surgery
- Capture and control costs of reusable and disposable instruments, repairs and replacements

Partnering with Aesculap

When you sign up for a PCMS program, you are partnering with the largest instrument manufacturer in the modern world. Our goal is to help you achieve superior patient care for each and every patient.

- Aesculap's instruments are made by master craftsmen to the highest industry standards
- Aesculap Sterilization Containers are the world wide market leader in rigid sterilization technology
- Aesculap repair technicians are trained every year in Tuttlingen, Germany in the same facility where the instruments are designed and controlled
- Award winning Aesculap Academy education programs
- Aesculap is a partner that supports your facility with both product and knowledge

Procedural Cost Management System

Introduction and Program Overview

Procedural Cost Management System (PCMS) is a program designed to provide high-quality surgical products and services to a facility on a fee per procedure basis.

Far superior than an instrument loaner, rental or lease program, PCMS customizes products and services into a convenient package based on your hospital's specific needs. Your facility gains access to Aesculap's premium line of products and services without capital investment. Specialty instrumentation from other manufacturers can also be incorporated into your customized sets. All your instruments will be routinely inspected to ensure that they are properly functioning and will be maintained and repaired as necessary.

PCMS will help to significantly reduce and contain your instrument and repair costs while providing on-going support for your surgeons, nurses and staff.

If you can answer yes to one or more of the below questions, a PCMS program could be right for you.

- Is your capital budget limited?
- Do you have a need for additional instrument sets?
- Do you want to save on instrument repairs and replacements?
- Do you have high costs for disposable instruments?
- Would you like to reduce the risk of patient burns and infections?
- Would you like your hospital to provide a constant standard of care?
- Would you like to have new instrument sets for 0% capital investment that function properly 100% of the time?

Did you answer yes to one or more questions? If so, call Aesculap today at 1-800-282-9000
